Dear Sir:

The Knights of Columbus have a busy meeting hall located on the P.F. Comeau road in Comeauville. It is active in its services to the community and is often used by many groups ranging from young dancers to seniors for various activities and events.

We are very concerned about the deteriorating condition of the road leading to the building which may lead to dangerous road situations. The road leads also to the local Golf Course and a busy physiotherapy clinic, all of which are used by seniors and not so attentive drivers.

A section of the road has ever deepening ruts and breaks in the pavement, which is a problem that will only get worse this coming winter. We understand that a permanent solution is difficult. However, in the past, you have carried out repairs which have improved the situation, but only for a short time. Please find a way to raise the roadway and make it safe for everyone in a permanent manner.

We are requesting that you please carry out the necessary repairs prior to this winter in order to improve the condition of this section and make it safer for use by the many persons using this road. Thank you in advance for your consideration of this request.

Yours sincerely,

Raynald Poulin

Grand Knight
